

Dietary & Enrichment Programs

Sometimes we can forget or can be further educated on feeding our dogs for their individual needs.

This ranges from and not limited too Puppy, Breed Specific ie. Working Dog, Dental, Seniors, High Protein, Low Fat, Raw, and the correct diet for animals with intestinal problems or allergies.

Just like us humans, our dog's have different dietary requirements and expectations of what's actually in their food.

With everyone's busy lifestyles these days, dogs can be left to their own devices for many hours per day. This isolation can more than likely lead to unwanted social and behavioural problems in our pets.

For those times when we can't be with our dog, we need to make sure they have an enriching and fun-filled environment to amuse themselves in our absence - day and night.

Kellie, as a Kong Demonstrator, can offer advice, toy choice and recipes to help keep your pooch entertained when alone.

Let us show you the enriching pawsable way today!
